FINE FIRECLAY

BOCCHI brings back the ultimate material to your kitchen. Fireclay, a 100% natural and recyclable material, used by craftsmen for centuries to create timeless fixtures, has now returned to our kitchens.

Due to the specialized manufacturing process, which includes firing in kilns up to 2000 degrees Fahrenheit, fireclay becomes one of the most durable materials used in today's kitchen sinks. Their specialized glaze coating that is fused with the fireclay body during firing gives fireclay sinks a non-porous, uniform surface which will not scratch, rust or stain over time.

BOCCHI Fireclay Kitchen Sinks allow homeowners to compliment other furnishings and incorporate many different themes to showcase their creativity.

Whether you are considering a BOCCHI Farmhouse sink with its distinctive design and color personality as the epicenter of your dream kitchen, or selecting the timeless elegance of fireclay as an undermount or drop-in sink, BOCCHI kitchen sinks are truly crafted to match your desires and style.

SUPER SMOOTH SURFACE

Super Smooth Surface technology has been developed to minimize lime remains, undesirable dirt and bacteria on ceramic surfaces and make cleaning easier. This technology is the result of many years of research.

Super Smooth Surface is 19 times smoother and has less roughness than regularly glazed surfaces.

Test results show that super smooth technology provides a surface that has a higher quality than regular porcelain surfaces. Therefore, the Super Smooth Surface requires much less water to clean and is more hygienic.

19X SMOOTHER, 19X EASIER

CLEAN+ TECHNOLOGY

Another innovative enhancement from BOCCHI is the Clean+ Technology. This technology helps you keep your kitchen sink always brilliant, clean, shiny and new.

Clean+ Technology decreases roughness so the contact angle of the ceramic surface can create a hydrophobic effect, which helps to prevent lime remains and undesirable dirt build up.

A smooth wipe and a mild cleaning would be sufficient to maintain the spark of your kitchen.

developed by **BOCCHI**.

BOCCHI takes great pride in producing our products with SUSTAINABILITY in mind. Our production processes and packaging are designed to minimize waste and reduce our carbon footprint. We only use sustainably sourced materials.

We believe that our customers should be able to enjoy high-quality products while knowing that they are doing their part for the environment.

General Care and Cleaning Tips

For best results, keep the following in mind when caring for your product: Always test your cleaning solution on an inconspicuous area before applying it to the entire surface. Wipe surfaces clean and rinse completely with water immediately after applying cleanser. Rinse and dry any over-spray that lands on nearby surfaces. DO NOT allow cleansers to soak on surfaces. Use a soft, dampened sponge or cloth. NEVER use an abrasive material such as a harsh brush or scouring pad to clean any BOCCHI surface.

Success with cleaners and procedures is dependent upon such factors as the hardness and temperature of the water, exact measurements of ingredients, changes in cleaning formulas and the condition of the product being cleaned. Since there are variations within these factors, BOCCHI cannot guarantee the effectiveness of the formulas mentioned.

Care & Cleaning Tips for Fireclay and Vitreous China: Rinse thoroughly and use a soft cloth to wipe the product dry after each use. Soft abrasive cleaners may be used when necessary to clean BOCCHI fireclay and vitreous china fixtures. Strong abrasive cleaners should NEVER be used and may scratch or dull the surface. The appearance of surface marks and build-up of rust or other stains, minerals, etc. on the surface may be easily removed using recommended cleansers such as Bar Keepers Friend.

Care & Cleaning Tips for Granite: Rinse thoroughly and use a soft cloth to wipe the product dry after each use. Soft abrasive cleaners may be used when necessary to clean, strong abrasive cleaners should NEVER be used. To prevent limescale build-up leave a solution of warm water and white vinegar or a specific descaling/anti-limescale product for use with granite sinks, on the sink bottom for a few hours (or as directed)—then rub vigorously with a non-abrasive sponge until clean and rinse and dry sink.
